

How does the Pacto pela Democracia work to defend Brazilian democracy?

1

Pacto pela Democracia is a nonpartisan coalition that brings together several Brazilian civil society organizations in defense of democracy.

2

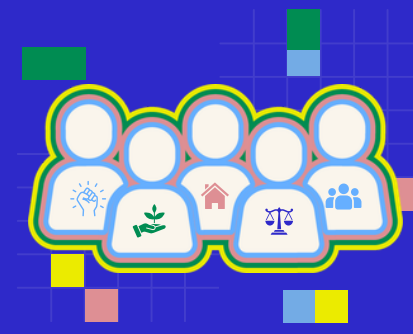

The organizations in the Pacto network have different areas of activity and political positions

3

Our mission is to guarantee and improve democratic conditions so that all struggles for rights, led by these organizations, can be effective and advance in a legitimate way

4

Each organization joins the advocacy actions, campaigns and projects based on proximity to its activities and perception of the scenario, not depending on consensus to be effective.
